

# How to water

**Over-watering  
can be a mistake**

**WATER LESS OFTEN  
FOR YOUR  
PLANT'S  
SAKE**

*Avoid frequent shallow watering as this keeps the roots near the soil surface. Watering less often allows roots to penetrate the soil and increase the plant's resilience in a dry period.*

*Consider a dripper system as it delivers water direct to the root system, doesn't cause overspray and prevents surface evaporation. Dripper systems also reduce the risk of plant fungal and insect problems, as leaves are not watered.*

*Save money and water with a water efficient garden goods rebate of up to \$100 when you spend \$250 on eligible water efficient garden goods.*

*Visit [www.savater.com.au](http://www.savater.com.au) or call 1800 130 952 for details.*

*For more handy tips consult your local nursery or garden centre.*
