

Hot weather maintenance

*Make changes
in the cooler seasons*
**IF YOU'RE
WONDERING WHY
HERE ARE THE
REASONS**

Avoid making changes in your garden during summer as the ground is likely to be hard and disturbed soil will lose more water. Wait for autumn, preferably after rain and when it's cooler.

This time of year you can still mulch, prune, create shade and reduce lawn area.

Make sure your dripper system is positioned for maximum efficiency and water is reaching plant roots. Let nature quench your garden's thirst whenever you can and check watering times for your area on the SA Water website.

Save money and water with a water efficient garden goods rebate of up to \$100 when you spend \$250 on eligible water efficient garden goods.

Visit www.sawater.com.au or call 1800 130 952 for details.

For more handy tips consult your local nursery or garden centre.
