

QUICK REFERENCE GUIDE

ISSUED 6th JANUARY 1997

	Section / Page		Section / Page
A		C (cont.)	
Access Chamber (Maintenance Hole)		Corrosion Protection	F1
900 ID	L4	D	
1050 ID	L5	Dewatering	C1
1200 ID	L6	E	
1500 ID	L8	Educt vents	J
bench/channel detail	L9	arrangement	J2,3
channel configurations	L10	locations	J1
conical top	L7	Electrical Cubicle	M8
jump-up external	L11	Embedment	G
jump-up internal	L12	ETSA Service (Pumping Stations)	M9
lightweight	L2,4	Excavation	G,C2
locations	L2	Explosives	C2
notes	L1	F	
trunk sewer	L13	Fence (Pumping Stations)	M10
Access Roadway for Pumping Stations		G	
cross section and drainage detail	M12	General Information	C
Allocation of Space	D3,D4	corrosion/cathodic protection	F
Australian Standards	E1	excavation, embedment,trenchfill	G1-12
B		I	
Battered cut	G3,4,7,8	Induct Vents	J
C		locations	J1
Cathodic Protection	F	Inspection Openings	L3
Concrete		locations	L2
for access chambers	L1	Inspection Points	K2
Connections	K	locations	K1
inspection point	K2		
intermediate riser	K7		
into access chambers	K9,10		
jump up at IP	K6		
locations	K1		
off trunk sewers	K12		
riser off main	K5		
single	K3		
through embankment	K8		
water seals	K11		
'Y'	K4
