- Call 1300 650 951, to make payment by Visa/MasterCard.
Credit card payments must be in full and no more than \$20,000.

Conditions relating to the provision of a water and wastewater connection for the attached property.

With respect to this application, I agree and accept the following conditions, and where this application is selected as being read and accepted by the applicant for and on behalf of an owner, the applicant shall inform the owner of these conditions, that:

1. You will be required to comply with relevant Acts and Regulations, and any special conditions that may apply to your connection.
2. The location of the connection and the meter may be pre-determined. This will be the case if an existing connection was pre-laid by the developer at subdivision.
3. Any relocation of the connection at your request will be at your cost. Relocation of the connection may not be possible in some cases.
4. Where connections are not pre-laid, and there being no constraints on site (ie large trees or other obstruction), the connection will be laid in the position you nominate on your application form. (Note: You or your builder will need to ensure that side boundary survey pegs are in position and visible before you apply for a connection. This will ensure your connection is provided in the required location).
5. The area of land between the proposed position of the water meter and the water supply is to be kept clear of obstruction in order that the connection can be made.
6. We will install the meter 100-150mm above the ground level (unless you have requested installation in an underground box). Any alterations you wish to make to the ground level must be completed prior to your application for water supply connection.
7. Once a meter is installed, the property owner is responsible for the payment of water use charges, including water usage on vacant land.
8. When a remote or indirect meter is installed quarterly water supply and water use charges will commence from the following quarter.
9. If an additional water meter is approved and installed, an annual service rent will be charged.
10. We will attempt to lay the water and/or wastewater connection in the position requested in this application. If this is not practical we will determine the position and this will be advised at the time of the quote.
11. All applications will require approval and/or investigation and will be subject to availability of mains near the site.
12. The connections will not be made until all fees associated with this application have been paid.
13. It is the customer's responsibility to reconnect any private pipework.
