

SA Water Irrigated Public Open Space (IPOS)

Irrigation Consumption Recording Sheet

Complete this template by recording the meter readings of one full irrigation, your end of month meter reading and the log of irrigation events.

Please forward the completed template by email to iposadmin@sawater.com.au at the end of each month. Please complete one record sheet per IPOS permit.

Please refer to the step by step guide for information on how to complete this template or call IPOS Administration on 08 7424 3719 for help

Organisation / Club Name: IPOS Permit Number:

(please note - enter the black numbers from the meter only - leave the red numbers off)

Enter your meter reading before irrigation

Enter your meter reading after irrigation

Please make note of this event in the irrigation log below

Your irrigation consumption →

kL →

please make sure this matches your Optimum Irrigation Event detailed on your IPOS permit or in your irrigation audit

Optimum Irrigation Event detailed on your IPOS permit

How to read your meter

Water meter displays can appear slightly different. However, each meter, regardless of type, is read the same way. The numbers on the display represent a different number of litres (or parts of a litre).

The white figures on the black background represent kilolitres (kL) – 1 kilolitre = 1,000 litres. The red figures on the white background represent litres. Some new water meters have a digital display.

In terms of irrigation the most important numbers to read and record are the kilolitres or the black digits.

eg:

In this example the meter reads 126 kilolitres or exactly 126.487 kL.

Please record only the white numbers on the black dials - ie the kilolitres.
