

**Proposed Adelaide Desalination Plant
Environmental Impact Statement**

EIS CHAPTER OUTLINE

VOLUME 1

Chapter Outline

EXECUTIVE SUMMARY

1 INTRODUCTION

1.1 The Proposal

1.2 Details of the Proponent

1.3 Assessment of Proposal

1.4 Other Legislative Requirements

1.5 Timeliness and Staging of Project

1.6 Structure of this Document

2 NEED FOR PROPOSED DESALINATION PLANT

2.1 Introduction

2.2 Project Objectives

2.3 Expected Benefits and Costs of ADP

2.4 Environmental, Economic and Social Considerations

3 DESCRIPTION OF PROJECT

3.1 Introduction

3.2 Description of Existing Environment

3.3 Nature of the Proposal

3.4 Management Arrangements

3.5 Decommissioning

4 MANAGEMENT ARRANGEMENTS FOR CONSTRUCTION & OPERATIONAL STAGES

4.1 Introduction

4.2 Management and Monitoring Framework

4.3 Risk / Hazard Management

4.4 Construction Effects

4.5 Operation Effects

5 PLANNING AND ENVIRONMENTAL LEGISLATION AND POLICIES

5.1 Introduction

5.2 Strategic Context

5.3 Land Use and Planning Assessment

5.4 Environment Protection Act

5.5 Consistency with Legislation

6 ENERGY, SUSTAINABILITY AND CLIMATE CHANGE

6.1 Introduction

6.2 Sustainability

6.3 Energy Management

6.4 Energy Efficiency

6.5 Options for Electricity Supply

6.6 Relevant Strategies and Legislation

6.7 Greenhouse Gas Emissions Management

6.8 Climate Change

EIS – Glossary

VOLUME 2

Chapter Outline

- 7 THE MARINE ENVIRONMENT
 - 7.1 Introduction
 - 7.2 Existing Marine Environment
 - 7.3 Environmental Considerations and Conceptual Design
 - 7.4 Potential Environment Effects
 - 7.5 Chapter Summary

- 8 THE TERRESTRIAL ENVIRONMENT
 - 8.1 Introduction
 - 8.2 Geology, Soils and Water
 - 8.3 Flora and Fauna
 - 8.4 Matters of National Environmental Significance
 - 8.5 Potential Environmental Effects
 - 8.6 Visual Amenity and Landscape Character

- 9 NOISE, DUST, ODOUR AND WASTE MANAGEMENT
 - 9.1 Introduction
 - 9.2 Air Quality Assessment
 - 9.3 Odour Assessment
 - 9.4 Noise and Vibration Assessment
 - 9.5 Waste Management

- 10 THE SOCIO-ECONOMIC ENVIRONMENT
 - 10.1 Introduction
 - 10.2 Economic Issues
 - 10.3 Traffic and Access Issues
 - 10.4 Effects on Communities
 - 10.5 Indigenous Cultural Heritage
 - 10.6 Native Title
 - 10.7 European Cultural Heritage

- 11 STATEMENT OF COMPLIANCE WITH GUIDELINES
 - 11.1 Introduction
 - 11.2 Compliance with EIS Guidelines
 - 11.3 Articles of the South Australian Government gazette
 - 11.4 Proponent Contacts

EIS - Glossary

Description of operation of Appendix H – Conceptual Model

APPENDIX CHAPTER OUTLINE

A	PLANT ENGINEERING, PROCESS & OPERATIONS STUDIES
A1	Matters to be considered for Intake and Outfall System Locations and Construction Methods
A2	Technical Memo - Power
A3	Technical Memo - Energy Recovery Device
A4	Technical Memo - Seawater Discharge Energy Recovery
A5	Technical Memo- Sustainability Review
B	MARINE ENGINEERING STUDIES
B1	Supply of Hydrographic Survey services for SA Water Desalination Project at Port Stanvac
B2	Marine Geophysical Survey
B3	Technical Report - Shallow Marine Geotechnical Investigation
B4	Previous Marine Geotechnical Studies
C	MARINE ENVIRONMENT STUDIES
C1	Literature Review Larval Entrapment and Entrainment
C2	Ecotoxicity Evaluation for Adelaide Desalination Plant Effluent and Process Chemicals
C3	Sediment Assessment Report
C4	Marine Characterisation Desktop Review
C5	Marine Ecological Characterisation Study Part 1 – baseline ecological surveys
C6	Marine Ecological Characterisation Study Part 3 – benthic surveys (Autumn)
C7	Marine Ecological Characterisation Study part 4: Benthic surveys (Winter)
C8	Marine Ecological Characterisation Study Reef Watch Feral Or In Peril Survey
C9	Macroinfauna / Meiofauna Characterisation Study
C10	Technical Report- Underwater Noise & Vibration
C11	Marine Mobile Species Review
C12	Spatial distribution of benthic habitats adjacent to Pt Stanvac
C13	Marine Risk Analysis and Assessment
D	MARINE MODELLING STUDIES
D1	Marine Hydrodynamic Modelling, as part of feasibility investigations into a possible desalination plant to supply Adelaide
D2	Near Field Dilution and Outfall Hydraulics Investigations
D3	Salt and Heat Budget and Particle Tracking Investigation for Gulf St Vincent
D4	Whole of Gulf Flushing Box Model
D5	Winter 2008 Current Measurements
E	WATER QUALITY
E1	Marine Characterisation of Water Quality at Port Stanvac
F	TERRESTRIAL ENVIRONMENT AND SOCIO ECONOMIC STUDIES
F1	Air Quality Assessment
F2	Noise and Vibration Assessment
F3	Flora & Fauna Assessment of potential sites for the proposed Adelaide Desalination Project at Port Stanvac
F4	Indigenous Heritage
F5	European Cultural Heritage Assessment of the proposed Port Stanvac site for the Desalination Plant
F6	Native Title Search

F7 Landscape and Visual Assessment
F8 Social Impact Assessment

G TERRESTRIAL ENGINEERING STUDIES

G1 Traffic Impact Assessment

G2 Preliminary Contamination Assessment Report

G3 Technical Report – Shallow Terrestrial Geotechnical Investigation

G4 Land Based Geotechnical Investigations 23.2 Previous Terrestrial Geotechnical report

G5 Interim - Deep Terrestrial Geotechnical Investigation report

G6 Topographical Survey Information

H ADELAIDE DESALINATION PLANT CONCEPTUAL MODEL
