MEDIA RELEASE

Mt Bold public access road temporarily closed

SA Water has closed its Mount Bold Reservoir gates to the public for the coming months to complete maintenance work along the public access road.

The repair work is scheduled to take three to six months to complete with public access to the Mount Bold reservoir area expecting to be reopened by the end of the year.

SA Water's Service Delivery Manager for the Outer Metro Region, Steve Rose, says the maintenance is required due to ground movement on the access road which could affect public safety.

"There will be some detailed work involved to reinstate the road appropriately. It's in a difficult location which means this may take us a longer period than usual to carry out repairs.

"Advice regarding the reopening of the road will be provided as work nears completion," he said.
