For civil construction work on developer funded projects associated with SA Water Land Development Agreement

Version No 9.3: September 2026

Disclaimer

The firms and individuals on this list have represented to us that they have the management capability, qualifications, expertise, and experience as well as technical capability to carry out construction, installation, testing and commissioning works for water, wastewater and re-cycled water infrastructure within the approved category areas, for Developer funded projects undertaken by formal SA Water Land Development Agreement.

We make no guarantees or warranties as to the performance, commercial practices or financial status of these firms or individuals and do not endorse any of the workmanship, or services offered by the firms or individuals listed.

It is strongly recommended that the Person Conducting the Business or Undertaking (PCBU) (Usually the Developer) undertake appropriate due diligence procedures when selecting a contractor from this list, to ensure that they (the PCBU) can ensure compliance with all applicable laws, regulations, best practice and the associated Land Development Agreement requirements e.g., technical standards, operational conditions and other applicable requirements e.g., ethical conduct.

Limitation of contractor's accreditation for category of works

SA Water recognise there is a wide range of civil construction skills and experience within South Australia, and we are committed to supporting local industry participation and their upskilling.

SA Water welcomes working with a developer and their preferred supplier to ensure our objectives can collectively be met whilst ensuring our workers remain safe and our new pipelines and facilities will provide the required service level to our customers and the community.

As an example, an existing accredited contractor may apply for temporary authorisation to work beyond their approved category accreditation to gain experience and upskill. The process involves conducting a work risk assessment and developing a suitable mitigation plan prior to the commencement of works and execution of the Land Development Agreement.

Contractors who are currently not on the Accredited Contractor List for Land Development may make application for inclusion.
