

Diving

Water Engineering Technologies offers a ADAS qualified dive team selected from tradesmen with extensive experience in low visibility or “black water” diving. The use of skilled tradespeople as divers ensures work is performed within timeframes and to a high standard. The divers are capable of performing underwater construction and maintenance to a depth of 30 metres.

What we can offer your business

- Tank cleaning
- Pump inlet/screen installation/cleaning
- Modifications
- Repairs
- Installation
- Underwater thermal lance cutting
- Investigative work
- Cable laying
- Search and salvage retrieval
- Dredging - sand and mud
- Cofferdam installation and sealing
- De-snagging
- Pile removal
- Surveying

The divers travel all over the State and even interstate as far as 10 hours away from our depot, regularly staying overnight or even weeks at a time.
